

Webinar – Heat-related Illness Prevention in Ag: A training for all NIOSH Ag Center personnel

All Ag Center personnel are invited to join this 'in-house' webinar to build your expertise on heat related illness. The course is designed to prepare you for engagement in our 2017 **Beat the Heat campaign**, where US Ag Centers are joining efforts to improve our media outreach and evaluation.

The program presents a quick overview on HRI prevention, guidance on tailoring messages for employer or worker audiences, and focuses on **the latest research results from Dr. Marc Schenker (Western Center) and Dr. June Spector (PNASH)**. Time is provided to address questions – please come ready to learn!

Date: Monday, June 5th 11-12:30 PT / 1-2:30 CT / 2-3:30 ET

Speakers:

Dr. Marc Schenker,
Professor and Director,
Western Center for
Agricultural Safety and
Health, UC Davis

Dr. June Spector,
Assoc. Professor, Pacific
Northwest Agricultural
Safety and Health Center,
University of Washington

Learning Objectives:

- Distinguish between the four types of heat illness
- Name 5 ways employers can prepare for the summer heat
- Describe 3 personal risk-factors every worker should be aware of
- Explain 2 recent research findings

Adobe Connect Video Conference:

Video - Go to <http://confer.uw.edu/pnash> from Safari, Firefox, or Internet Explorer web browsers

Choose "Enter as a Guest" - Type your first and last name into the field and click "Enter Room"

TIPS: Currently Google Chrome has compatibility issues with Adobe Connect – use alternative browser.

Download Adobe Add-In Feature – Required for video conference

If you do not have speakers on your computer, you can access the phone line in conjunction with the video.

Phone-Audio - [1-800-379-6841](tel:1-800-379-6841), Participant Code: 834246

ALERT: Take care not to have your computer and phone audio on at the same time. This will result in disrupting feedback.

System Check: To ensure the participants' computers and networks are properly configured, provide the following link for them to test their systems.
