

COVID-19 VACCINES

Vaccines do not make you sick, they save you.

COVID-19 vaccines are proven to be safe and effective, even for people with chronic conditions like diabetes and hypertension. Vaccines are also safe for breastfeeding and pregnant women.

Vaccines are free to everyone living in the U.S., no matter your immigration status. Your personal information will not be shared with the federal government or immigration agents.

You should get vaccinated even if you had COVID-19. Vaccines provide additional protection and may help against variants of the virus.

To find a vaccine near you, call **1-833-422-4255** or visit **[vaccinateall58.com](https://www.vaccinateall58.com)**

Vaccines strengthen your defenses to fight COVID-19 and are safe and effective at preventing serious illness, hospitalization, or death due to COVID-19.

Vaccines do not inject the virus that causes COVID-19. They do not inject a chip, change your DNA, or cause you to be magnetic.

Side effects can occur and are normal. Your arm may be sore for a few days. Some people have a stronger reaction after a second shot or if they had COVID-19 before.

You may be eligible for supplemental paid sick leave if you or a family member you are caring for have COVID-19, to cover a vaccine appointment, or if you cannot work due to vaccine-related symptoms. Immigration status does not affect eligibility.
